

Version 6.7

Release Section

provided as "1" for "ProspectFlag" in the API, for creating a customer as a "Prospect". API Spec name- /CustomerMaster.

- Provision to view Item Short Desc.in View Item Information- Entry page.
- New District column added in Supplier Master.
- Zip Code / Pin Code mandatory by enabling System Installation Parameter.
- Sale Order number search criteria added in Material Move to Inventory page to fetch Production Order details which has created based on Sale Order.
- Inventory Hub – Inquire Stock Items searched based on different status. New status Stock- In Transit node added to fetch In-Transit item details.
- Financial Calendar Closure Hub- Pending transactions will now show the functions 'SC Parents items' and 'Receipt Acknowledgement' separately in the dropdown for the Receiving Function BFG.
- Inspection Order API: New action flag has been included to enable inspection order generation. By getting the input values for IO description, type, category, priority, start date-time, inspection order can be generated using this API for multiple equipment, locations and parameters.

Workflow Infra related enhancements

- 'OU Desc.' added as an additional filter in ENABLE WORKFLOW SECURITY screen.
- In case of any issue in WF configuration, system can now throw an Error on transaction creation itself instead of moving to Error user – This is based on configuration entry in wf_engine_settings
- Upon Re-initiation of a rejected document at any stage, generally the document goes from the First level all over. This is now configurable where the reinitiated document can be resent directly to any N-x level with notification to other users (configurable in wf_engine_settings)

Apart from the feature enhancements, here are the key fixes that come along with this service pack, and this can be viewed from the path: <http://bit.ly/3Mj6hES>
