

Version 6.9

Release Section

VI. Financial Services

❖ Uplifting Mutual Funds and Share Transactions

❖ Summary:

Facility to record Funds and Shares of the Company in the application. Prebuild issues in the Investment Transaction and Reports on Financial services components in Financial Services BPC are fixed.

❖ Feature Category:

Usability

❖ Prerequisites:

Nil

❖ Description:

The Funds and the Shares can be recorded in the application and reports for these can be extracted.

❖ How to Use?

For Shares:

Firstly, the shares need to be created in the “Maintain Share Information” activity and the initial balance needs to be completed for the share in the “Create Initial Balance” activity. The Dividend details, Income details and redemption details can also be recorded in the respective activities. If there is any sale of shares, it can be recorded in the “Maintain Sale of Share Details” activity. When the share payment is made, or purchase of share is done, it can be recorded in the respective activity. Reports for viewing all the recorded details of Shares can also be extracted from the Reports on Financial Services component.

For Fund:

Firstly, the Fund needs to be created in the “Maintain Mutual Fund Information” activity and the initial balance needs to be completed for the Fund in “Create Initial Balance” activity. The Dividend details, Income details and redemption details related to the fund can also be recorded in the respective activities. If there is any redemption made for the fund, it can be recorded in the “Maintain Mutual Fund redemption details” activity. When the share payment is made, or purchase of Fund is done it can be recorded in the respective activity. The Fund transfer from one Fund ID to another Fund ID can be done in the “Maintain Mutual Fund Switch out-In details” activity.

Reports for viewing all the recorded details of the Fund can also be extracted from the Reports on Financial Services component.

Nil.

❖ Other Impact:

Nil.

❖ Provision to Modify the Accrued Interest Recorded against Fixed Return Investments

❖ Summary

Facility to reduce Accrued Interest already recorded against FDR.

❖ Feature Category:

Core Functionality.

❖ Pre-Requisites:

NIL

❖ Description:

If Accrued Interest is recorded for the Investment and the same is to be increased, again accrued interest can be recorded for the investment. However, there was no provision to reduce the accrued interest already recorded for the investment. Now this has been made available with a new option.

❖ Navigation:

Financial Services → Investment Transaction → Track Fixed Return Investment Details

❖ How to Use?

- Select the Option as “Reduce Accrued Interest”
- Provide the appropriate Value in the **Search Criteria** Section and Click on the **Get Detail** Button.
- Fixed Return details will be listed in Multiline.
- Provide the Interest Amount (Net of TDS) as an amount by which you want to reduce the Accrued interest amount already recorded for the FD.
- Provide the TDS amount (If TDS is enabled for the Company) as an amount by which you want the TDS amount already recorded for the FD and to the extent for which the certificate is not generated.
- Provide other Mandatory Fields details.
- Click on Compute and then Generate Voucher Task

- Journal Voucher will get auto-generated. Postings for the Journal Voucher will be as follows.

Interest A/c Dr.

To Accrued Interest A/c Cr

To TDS Receivable Account.....Cr.

The screenshot shows the 'Track Fixed Return Investment Details' screen in the Ramco ERP Suite. The 'Option' dropdown menu is open, and the 'Reduce Accrued Interest' option is highlighted with a red arrow. The table below shows three rows of investment data. The 'Tax JV Information' section at the bottom includes fields for 'Tax JV Numbering Type' (RS1JV), 'Transaction Date' (09/09/2024), 'Own Tax Region' (Z1), and 'Remarks'. A 'Generate Voucher' button is located below the remarks field.

❖ Notification & Workflow for Repayment Schedule Generation From Loan.

❖ Summary:

Mail based notification and approval & Mobile based ANA Notification enabled for Repayment Schedule generation from Loan

❖ Feature Category:

Workflow Notification & Approval.

❖ Pre-Requisites:

Workflow to be enabled for the Repayment Schedule generation from Loan.

❖ Description:

Workflow is enabled for the following Work areas-

“Approval of Maintain Repayment Schedule”

“Amend & Approval of Maintain Repayment Schedule”

“Approval of Voucher Generation”

❖ How to Use?

Approval or Rejection of Repayment Schedule via Mailer

- For the said Activity, levels of authorization can be set in the Workflow configuration.
- On generation of the Repayment Schedule, Notification will be received as E-mail & also in Wizard Inbox with action button to Approve & Reject.
- Mail content as pre-configured will go to the user- Email ID as defined in the Path.

For Workflow Push Notification through UNIFY

- For the said Activity, the levels of authorization can be set & Push Notification to be set as Yes.
- On the generation of the Repayment Schedule, Push Notification will come as a notification on the mobile screen & inside the Unify App.

Viewing WORKFLOW History

- WORKFLOW STATUS link Control added in Header of **Maintain Repayment Schedule** for viewing Workflow History.
- Column in the Multiline of the View Loan Details Page is added as a Link to view the Workflow History for the Loan—Schedule No.

- Column in the Multiline of the **Generate Voucher** Page is added as a Link to view Workflow History for the Loan – Schedule No.

❖ **Business Scenario:**

Multi-level Approval for Loan Schedule Generation.

❖ **Limitation:**

Nil

❖ **Other Impact:**

Nil.

❖ **Amendment of Repayment Schedule generated for Loan**

❖ **Summary:**

Amendment of Repayment Schedule generated for Loan.

❖ **Feature Category:**

Core Functionality.

❖ **Pre-Requisites:**

Nil.

❖ **Description:**

After Approving the Repayment Schedule, the user can amend the Repayment Schedule and can make necessary changes as needed.

❖ **How to Use?:**

- As per the existing Functionality Loans with the following status would be fetched for Repayment Schedule generation
 - “Authorized”, loans for which fresh Repayment schedule is to be generated
 - “Asset Mapped” loans (Capital Financing) for which Fresh Repayment schedule is to be generated,
 - “Pending voucher Generation” for Modification of schedules – regeneration of schedules and
 - “Rolled Over” status Loan to Generate schedules for the extension.
 - Now, a provision has been made to amend the Loan. Hence, the “Schedule Generated” and “Amended” status Loan will also get fetched.

- Enter the Loan Number in the "Loan Agreement Number" field.
- The details of the loan will be fetched automatically.
- If this is the first amendment to the loan, the Version Number will be displayed as 0.
- If there have been multiple amendments, the Version Number field will be automatically populated with the latest version number. The corresponding details for that version will also be displayed on the screen

Details that can be amended are as Follows –

- Repayment Voucher Generation (Yes/No) values can be modified
- Payment Information section details can be modified
 - Electronic payment
 - Payment Method
 - Payment Route
 - Payment Mode
 - Bank Code
 - Final/ Balloon payment
 - Repayment Details section details
 - Payment Frequency
 - Start Date
 - End Date
 - Repayment Option
 - No. Of Installment
- After providing modification details user can generate new schedules for the Unpaid Principal amount.

Outstanding Principal Loan Amount = Loan Amount – Principal Amount of Payment Voucher which is in Paid status

- Amend Button will be visible when the Loan status is Pending Voucher Generation or Schedule Generated or Return Amendment. On clicking the Amend task the Loan Status will change to amended.
- On Approve, Loan Status will change to Schedule Generated/ Pending Voucher generation

❖ **Business Scenario:**

Amendment of loan for Additional Loan, or for prepayment of partial loan

❖ **Limitation:**

Amendment of loan cannot be done if Deferred interest is set as YES.

❖ **Other Impact:**

Nil.

❖ Dimension Enhancement in Generate Voucher

❖ Summary

Dimension is now Enhanced for Repayment Voucher Generation using Generate Voucher

❖ Feature Category:

Core Functionality

❖ Pre-Requisites:

Dimension applicability to be set for the Installation or Company and Dimensions setup to be done.

❖ Description:
